Foreword—

The mission of The News and Observer is to serve North Carolina. Forty years ago its management, feeling the need of a Vade Mecum of North Carolina which would compress into a small volume information that did not exist about men and things, began the publication of The North Carolina Year Book. It truly supplied "a long felt want." The Year Book undertakes to be a summary of North Carolina's indebtedness, by separate government agencies, the valuation of property, the tax rates, population and area statistics, its educational and eleemosynary institutions, the industrial and banking interests of the State and other information that could be found in no other single volume. As corollaries to these statistics and official data, there was the need of a roster of the public officials of the counties and the State, professional men, officers of patriotic and all other societies touching the life of the State. Within the pages of The North Carolina Year Book will be found, for example, the name and address of the Sheriff of every county as well as all other officials, committees of all political parties and the official vote for State officials, the officers who man all banks and factories—in a word, there is contained thousands of names of important personages in the State and their functions. The Year Book, like The News and Observer, has become an institution devoted to service to the State. It fills a niche no other publication aspires to fill. When a better Year Book is needed, The News and Observer will furnish it. Personally I could not carry on when editing the paper without the Year Book and this is as true of all others who find the need of having close at hand an index of North Carolina and North Carolinians.

More about PREPAREDNESS

The Waterville Hydro Electric Development, with an installed generating capacity of 145,000 horsepower, was completed in 1930 in keeping with our company's policy to build, in advance of demand, an adequate source of dependable electric power. This plant is one of twelve generating stations which can supply the increased demand for electric power that may result from the Defense Program in the area we serve.

"THE COUNTRY'S whole industrial armour is being strengthened by widespread preparation for increased production. The long-established record of private utilities for being progressive, adjustable, and mobile in the face of changing social and economic conditions gives American industry the feeling of security in its power supply for tomorrow. Under the American system of private initiative private industry can meet, most effectively, national emergencies as they arise, whether the need be for steel or munitions or transportation or power." from a recent report by U. S. Chamber of Commerce.
